

Agenda for the
WTC Expert Technical Review Panel Conference Call
May 12, 2004
11:00-1:00 EDST

11:00 Discussion of Sampling Program

- What to measure for: Contaminants of Potential Concern (COPCs), the WTC signature, dust versus air sampling
- Sampling "units": apartments, buildings, common areas, central HVAC units, schools, firehouses
- Sampling objectives: to determine the level of "recontamination" versus the level of "contamination"; to determine the role of central HVAC in redistributing WTC contaminants; to determine the geographic extent of sampling
- Overall study design: "recontamination" as originally offered by EPA, "contamination" of apartments, screening-level building survey, focused building study in a "case study" mode

12:40 Discussion of May 24th Meeting at St. John's University

12:45 Discussion of Summer Meetings (July/August)

12:50 Public comment period

1:00 Call ends
